

VHF / UHF DELUXE ANTENNA

Standard Frequencies available: 146, 156, and 162 Mhz

Custom Frequencies available: 122– 485 Mhz

The Morad Deluxe Antenna is a small size, lightweight antenna designed for masthead mounting on sailboats and small high-speed powerboats where size and weight are important factors.

This half-wave, base-fed marine antenna has an effective gain of 3 db and provides optimum communication even when heeled over in heavy weather.

“O” ring seals are used between all surfaces of the antenna body to ensure complete weather tightness, and the antenna has a high tensile-strength stainless steel tip.

Its PL-259 connector permits easy installation on a wide variety of marine antenna mounts.

Bands	Available in VHF Marine and Custom VHF/UHF frequencies
Antenna Gain / Pattern	3dB / Omnidirectional
SWR	1.15 : 1
Coating/Color Finish	White acetal base w/ stainless steel whip
Base connector	S0239 (connects to PL259)
Power / Impedance	50 Watts / 50 Ohms
Wind Survival	100 mph
Mounting	Adaptors available for ratchet or stanchion mount
Dimensions	Height depends on frequency. 156 Mhz is 38.75” All frequencies maximum diameter is 0.75” Weight: Approx. 3 ounces Shipping Weight: Approx. 9 ounces
